

# SAQR-ATEX certified repair

**LATTYseal SERVICES, the only SAQR-ATEX-certified workshops in France, guarantee that the repair and reconditioning of your equipment identical to the original, without any modification to the protection methods or safety levels.**

This certification apply to all types of equipment: mixer seals, pumps seals, rotary unions, etc. used in ATEX zone environment.

**There are two following levels of protection:**

- **NORMAL:** equipment category 3, used in zone 2
- **HIGH:** equipment category 2, used in zone 1
- **VERY HIGH:** equipment category 1, used in zone 0

## A guarantee of quality and security

Where machinery is operated in an explosive environment and to maintain the required levels of ATEX certification it is essential to use a suitably qualified repair agent.

Due to the investment and on-going training, Groupe LATTY service are authorised and certified repair agents for all levels of SAQR-ATEX.
