

Live loading system

LIVE LOADING SYSTEMS (LLS)

Live loading systems (LLS)

TO CHECK THE PRECISE APPLICATION OF A GIVEN LOAD

- NO MORE MEASUREMENT TOOLS REQUIRED (TORQUE WRENCH, ETC.)
- SUITABLE FOR VALVES, LOW-SPEED ROTARY UNITS AND FLANGES
- INCREASES THE TIME INTERVAL BETWEEN MAINTENANCE OPERATIONS AND MINIMISES POLLUTANT EMISSIONS

COMPOSITION

Conventional applications for valves. Factory-preset cartridge. Easy installation. Exceptional quality of sealing for valve stems. With its vast range of mechanical seals, LATTY International can offer a solution which, combined with the LATTY Live Loading System, will solve the problem of leaking valve stems. With its special energy device, LATTY LLS applies the required load to be transmitted in order to offset the low volume losses that occur over time.

TYPES OF INDUSTRIES
