LATTYgraf EF NG & LATTYgraf 6995 NG

PACKINGS PREFORMED PACKING RINGS

These new 99.5% pure graphite rings have been developed to primarily meet the needs of the petroleum industries.

LATTYgraf EF NG is used as sealing rings in conjunction with LATTYgraf 6995 NG used as anti-extrusion rings and complies with the requirements of ISO 15848-1, Class BH.

The preformed rings LATTYgraf EF NG contain LATTY's exclusive corrosion inhibitor. These rings have been designed to improve friction coefficients.

Advantages

- **High resistance** to significant temperature or pressure variations
- **Reduced operating effort**
- **The corrosion inhibitor** (exclusive LATTY process) durably protects the parts of the fitting
- **Ready-to-use preformed rings:** quick stuffing box implementation and replacement, reduced production downtime
- **Reduced maintenance costs** and increased equipment service life
- **Multi-purpose:** suitable for a large number of applications
- **Made in France**

Applications (all fluids)

- Valves and fittings for Fugitive Emissions
- On-or-Off valves and fittings
- Control and regulating valve manufacturers
- Refineries
- Chemical industry
- Petrochemical industry

Homologations

- Standard ISO 15848-1, Class BH in industrial valves and fittings: Qualification measurement, tests and operating methods for Fugitive Emissions
- Complies with the requirements of Clean Air Act Amendments

Product	Temperature	Pressure	pH
LATTYgraf EF NG	-200°C to + 600°C	400 Mpa	0-14
