

BRAID MOVEMENT BOX

PECODEY

**ROBUST WATERPROOFING SYSTEM
FOR SLOW APPLICATIONS < 2M/S**

ECOLOGICAL AND EASY TO INSTALL

PECODY

STRONG AGITATION BOX – FOR LOW APPLICATIONS < 2M/S

Using its experience in packing braids and sealing systems, LATTY has developed the PECODY system (“Presse Etoupe à COMpression DYnamique”) combining the latest technical sealing system packing advances with the dynamic compression system. This technology makes the sealing of systems subjected to the most severe operating conditions reliable where other systems have reached their limits.

Advantages

- ▶ Economical & Ecological
- ▶ Easy to install
- ▶ Specific shaft sleeve to protect your equipment
- ▶ Limited resistive torque thanks to LATTYcore braiding technology
- ▶ Scalable solution because internal components can be modified if operating conditions change
- ▶ No adjustments required for commissioning
- ▶ Ergonomic design for easy access for assembly, disassembly and reconditioning
- ▶ Compact design for hard-to-reach areas

Benefits

- ▶ Time saved during maintenance operations: programmable, quick maintenance without uncoupling the machine.
- ▶ No lengthy operations in hazard, radioactive and dusty zones.
- ▶ Increased productivity: the direct wear status reading makes it possible to plan maintenance phases well in advance
- ▶ Increased maintenance team autonomy: supply of repair kits without installation prerequisites (instructions)

Available options

- ▶ Nitrogen regulation and monitoring control system (Atex)

Approvals

- ▶ ATEX, FDA, EHEDG, CE 1935-2004

Fluids

- ▶ Abrasives
- ▶ Charged
- ▶ Sealants
- ▶ Pulverulent
- ▶ Toxic
- ▶ Flammable or explosive (inerting)
- ▶ Powder
- ▶ Gases

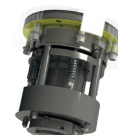

Equipment

- ▶ All equipment

Examples

Up and down

Bearing

Dry

Chemicals - Pharmaceuticals

Nuclear

Hydrogen

Mining - Quarries
